Value Leader: 2023 EMA Radar™ for Privileged Access Management

State and local agencies face no shortage of cybersecurity challenges and requirements, including embracing a Zero Trust architecture. In this journey, agencies must secure complex, distributed, disconnected hybrid environments while ensuring frictionless user experiences for employees and contractors—both in-office and remote.

Privileged Access Management (PAM) plays a critical role in securing state and local agencies and delivering critical services by ensuring that users have access to only the applications and data needed for their roles. At Delinea, we believe the opposite of complex isn't simple – it's seamless.

✔ A partner for modern access requirements

Delinea's PAM solutions deliver secure privileged access, on demand and at scale, for state and local agencies' diverse IT estates. The Delinea Platform seamlessly extends PAM by providing authorization for all identities, controlling access to an organization's most critical hybrid cloud infrastructure and sensitive data to help reduce risk, ensure compliance, and simplify security. Our PAM solutions also enable just-in-time, just-enough privilege elevation to ensure user productivity and efficient delivery of government services, while least-privilege based on a Zero Trust approach prevent the lateral movement of attackers. Finally, our early warning of privilege-related attacks enables faster event containment.

✔ Engineered for seamless security across complex workflows

State and local agencies depend on secure collaboration across silos to deliver critical community services. Delinea delivers the reliable, real-time privileged access controls needed to fuel and secure modern workflows. Further, our solutions enable automated lifecycle management from discovery through decommissioning and secure access for remote IT staff and partners without a VPN.

✔ Faster time to value

Delinea understands that for state and local agencies the mission cannot wait, and our solutions are designed to accelerate time to value. We deliver Day One adoption of privilege controls at scale. Delinea's PAM products are pre-integrated with over 200 solutions and delivers out-of-the-box auditing and reporting for streamlined compliance.

Delinea is a trusted partner to of state and local agencies across the nation – from the smallest towns to the largest states – because we make privileged access more accessible for everyone. Whether in the cloud or on-premises, our solutions are readily customizable, scalable for growth, and powerful enough to secure your agency no matter where it is on its PAM maturity journey.

Delinea Platform

Delinea Platform

Seamlessly extend Privileged Access Management to provide just-in-time access with easy, adaptive controls

- Establish a Secure Vault
- Secure Remote Access
- Extend MFA Enforcement
- Access the Marketplace
- Scale Easily

Protect Privileged Access

Secret Server

Discover, manage, protect, and audit privileged access

- Establish a Secure Vault
- Discover Unknown Accounts
- Delegate Access
- Manage Secrets
- Control Sessions

Privileged Behavior Analytics

Detect anomalies in privileged account behavior

- Secure Accounts
- Establish Baselines
- Monitor & Identify
- Alert
- Take Action

DevOps Secrets Vault

Protect the secrets that DevOps teams and RPA tools need

- Establish Vault
- Centralize Secrets
- Automate & Scale
- Issue Certificates

Account Lifecycle Manager

Control and manage service account governance

- Establish Workflow
- Delegate Ownership
- Provision Service Accounts
- Enforce Governance
- Decommission Accounts

Secure Endpoints and Devices

Server PAM

Manage identities and policies on servers

- Centrally Manage Identities
- Enforce Adaptive MFA
- Adopt Least Privilege
- Improve Security & Compliance

Privilege Manager

Implement endpoint application control for workstations

- Deploy Agents
- Manage Accounts
- Define Policies
- Elevate Applications
- Improve Productivity

Enable Remote Work

Connection Manager

Ensure unified management of remote sessions

- Establish Remote Access
- Manage Sessions
- Centralize Control
- Record Sessions
- Track & Audit

Remote Access Service

Secure remote access for vendors and third-parties

- Secure Remote Access
- Reduce Vulnerability
- Streamline Deployment
- Centralize Third-Party Access
- Monitor and Record Sessions

Delinea

Delinea is a leading provider of privileged access management (PAM) solutions for state and local governments on the path to modernization. Our solutions provide centralized management and rapid time-to-value for departments that need to reduce risk, ensure compliance, and simplify security. Delinea removes complexity and defines the boundaries of access so state and local governments can streamline operations and better serve constituents. delinea.com
